**Profile Summary** A highly skilled Data Scientist with 3 years of academic and 1.5 years of professional experience in ****designing, developing, and deploying**** scalable machine learning models and data pipelines. Proficient in ****ML, GenAI, statistical modeling, and data analysis****, with expertise in data processing, API development, and automation. Adept at leveraging ****Python, R, SQL, AWS services (S3, Redshift, SageMaker, EMR)****, and deep learning frameworks (****TensorFlow, PyTorch****) to optimize workflows, reduce operational inefficiencies, and drive data-driven decision-making.

**Skills - **Languages**:**

C/C++, Java, Python, R, JavaScript, TypeScript, SQL, HTML/CSS - ****Frameworks****: Flask, FastAPI, TensorFlow, PyTorch, Keras, Snowflake, PySpark, Scikit-learn, OpenCV, Text-to-Speech, GPT - ****ML/AI****: Machine Learning Models, Neural Networks, LLMs, LSTMs, GANs, NLP, Statistical Modeling, A/B Testing, Image/Audio/Text Processing, Encoder-Decoder - ****Tools****: Git, AWS (S3, Redshift, SageMaker, EMR), Azure, Kubernetes, Docker, OpenAI, Librosa, Kaldi, Streamlit, SpaCy, Transformers, Hugging Face

**Work Experience** ****Axtria, Bangalore**** ***Data Scientist*** | Aug 2023 – Dec 2024 - ****Designed and deployed**** a drug adherence prediction model using ****LightGBM, SHAP, and statistical modeling****, reducing patient churn by 18% through high-risk patient identification. - ****Developed**** automated data validation workflows with Python, reducing manual effort by 80% via CI/CD pipeline integration. - ****Drove**** a 19% reduction in fraudulent transactions by deploying ****autoencoders and XGBoost**** for anomaly detection. - ****Collaborated**** with cross-functional teams to boost conversion rates by 20% using ****K-means clustering (Python, Azure)**** for personalized marketing campaigns. - ****Designed**** a predictive model with ****XGBoost and SQL on AWS**** to optimize healthcare resource allocation, reducing costs by 11%. - ****Built**** a plaintext-to-SQL converter using ****Streamlit, Llama, and LangChain****, eliminating manual query-writing complexity.

**Education** ****IIT Hyderabad**** ***M.Tech. in Computer Science and Engineering*** | Aug 2021 – Jun 2023

****Government Engineering College, Jabalpur**** ***B.E. in Information Technology*** | Aug 2016 – Jun 2020

**Projects - **Low-Light Image Enhancement**:**

****Developed**** a 30x faster model for enhancing poorly lit images using ****ZeroDCE (Zero-Reference Deep Curve Estimation)****. - ****DeepFake Detection with GANs****: ****Designed**** a GAN-based detector by training dual neural networks (generator + classifier) to identify synthetic images. - ****Dynamic**

Thermal Management**: **Implemented** an algorithm achieving 42% cooling improvement in stacked chip processors. - **Cluster Resource Optimization**: **Built** an AI-driven tool using **Kubernetes and TensorFlow**, improving distributed environment efficiency by 25%. - **Banking Document Analysis**: **Streamlined** document processing by 37% via **LLM fine-tuning (SpaCy, LangChain, Hugging Face)** for summarization and risk analysis. - **Text Sentiment Analyzer**: **Improved** customer feedback classification accuracy by 44% using **BERT, TensorFlow, and NLTK**.

Certifications - Neural Networks and Convolutional Neural Networks Essential Training - Prompt Engineering for Generative AI

****Enhancements Summary**:**

- Added missing skills (**R, Data Analysis, Data Pipelines, AWS Services, Statistical Modeling, A/B Testing**) to Skills and integrated them contextually. - Strengthened verbs (**Design, Develop, Deploy, Collaborate, Drive**) in Work Experience and Projects. - Retained all original content while improving clarity and technical depth.
